Juan Sebastián Salazar Garrido

+57 333 2538876 | juanssalazarga@gmail.com | LinkedIn | Bogotá, Colombia

Chemical Engineer (M.Sc.) | Data Analyst | Data Quality | Life Sciences

Chemical Engineer (M.Sc.) with experience in **data validation, laboratory data analysis, and quality analytics** across pharmaceutical, environmental, and biotechnology industries. Experienced in analyzing **high-volume datasets, identifying data quality issues**, investigating deviations, and improving reporting processes using **Excel, SQL, Power BI, LIMS, and electronic documentation systems**. Strong background in data integrity, GMP/GLP, US EPA methods, and scientific research. **English C1 and German B2**.

Professional Experience

SGS Colombia

Environmental Data Validator – Inorganics *Oct 2025 – Present* | *Environmental Testing Laboratory*

Key Responsibilities

- Validate high-volume inorganic laboratory datasets according to US EPA methods and internal SOPs.
- Analyze QC data including recoveries, RPD, blanks, spikes, duplicates and control samples to identify data quality issues.
- Review data integrity in LIMS and electronic documentation systems under ALCOA principles.
- Investigate analytical deviations prior to client release.

Key Achievements

- Process and validate **300+ samples/day**, approximately **50% above standard throughput**.
- Reduced data rework and report corrections by **~30%** through early QC deviation detection.
- Improved report turnaround time by **~20%** through optimized validation workflows.

La Santé

Stability and Validation Analyst II *Sept 2024 – March 2025* | *Pharmaceutical Industry*

Key Responsibilities

- Reviewed and analyzed pharmaceutical stability data.
- Validated physicochemical and microbiological results across stability studies.
- Reviewed HPLC, dissolution, moisture and impurity data against specifications.
- Ensured traceability and ALCOA-compliant documentation.

Key Achievements

- Reviewed data across **200+ pharmaceutical products**.
- Designed an **Excel traceability tool**, reducing review time by **40%**.
- Helped prevent rejection of **15 production batches valued at >USD 75,000**.

Corpobiomar

Laboratory and Quality Coordinator *Jan 2020 – Jun 2024* | *Spirulina and Bioproducts Production*

Responsibilities

- Analyzed physicochemical and microbiological data to support laboratory quality control.
- Implemented GMP procedures and quality controls for bioproduct manufacturing.
- Coordinated technical and regulatory documentation supporting product registration.

Achievements

- Increased phycocyanin purity by **20%** through process optimization.
- Improved spray drying efficiency by **20%** and final product purity by **25%**.
- Supported successful **INVIMA product registration**.

Teleperformance Colombia

Risk Operations Specialist (Stripe) Aug 2020 – Aug 2022

Responsibilities

- Analyzed customer account activity to identify fraud and policy compliance risks.
- Applied risk-based decision frameworks and investigated cases using internal tools.
- Maintained accurate case documentation while meeting SLA and quality requirements.

Achievements

- Consistently exceeded quality and productivity targets.
- Supported high-volume case review in a KPI-driven environment.
- Strengthened analytical decision-making through risk and compliance investigations.

Fundación Terrazul

Research Assistant – Analyst | Jan 2014 – Jan 2016

Responsibilities

- Analyzed experimental data from *Haematococcus pluvialis* cultivation and astaxanthin extraction studies.
- Evaluated cultivation and extraction conditions to support process optimization.
- Standardized laboratory and analytical procedures.

Achievements

- Increased extraction yield by **35%** while reducing process costs by **20%**.
- Reduced assay time by **30%** through protocol standardization.
- Reduced water contaminants by **40%** through improved quality-control monitoring.

Scientific Research & Technical Communication

M.Sc. Research – Single Cell Protein Production

- Conducted a two-year research project on *Candida utilis* fermentation kinetics and culture media optimization.
- Prepared scientific documentation and technical materials for research dissemination.

ISSCT XXXII Congress – 2025

- Presented scientific research on microalgae/bioproducts at an international scientific congress.
- **Awarded Best Poster – Co-products.**

Education

- **M.Sc. in Chemical Engineering** – Universidad Nacional de Colombia (2020–2024)
- **M.Sc. Chemical Engineering (Incomplete – thesis pending)** – Ulm Universität, Germany (2017–2019)
- **B.Sc. in Chemical Engineering** – Universidad de América, Colombia (2010–2016) *Degree validated by the Chamber of Engineers, Baden-Württemberg, Germany*

Certifications

- **Internal Auditor ISO 9001:2015** – SENA, Colombia (May 2025)
- **Google Data Analytics Professional Certificate (In Progress)** – Google / Coursera

Technical Skills

- **Data Analytics:** SQL | Advanced Excel | Pivot Tables | Power Query | Power BI | Tableau | BigQuery
- **Data Quality & Laboratory Data**: Data Validation | Data Integrity | ALCOA | QC Data Review | LIMS | Analytical Data | Data Traceability | Quality Metrics
- **Programming & Analysis:** R Studio | Python | MATLAB
- **Quality & Life Sciences:** GMP | GLP | USP | US EPA Methods | SOPs | CAPA | Root Cause Analysis | Stability Studies

Languages

- Spanish: Native
- English: Advanced (C1 – TOEFL)
- German: Upper-intermediate (B2 – TELC Zertifikat)
